BUX98A

High power NPN transistor

Features

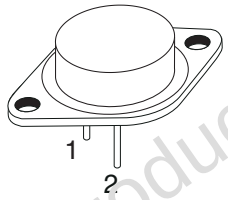
- High voltage capability
- High current capability
- Fast switching speed

Applications

- High frequency and efficency converters
- Linear and switching industrial equipment

Description

The BUX98A is a multi-epitaxial mesa NPN transistor in TO-3 metal case, intended for industrial applications from single and three-phase mains operation.



TO-3
Type R

4 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
