Description

The nRFready µBlue Desktop is a complete hardware and software reference design for completing a *Bluetooth* Smart keyboard and mouse. The design is based upon Nordic's nRF8001 *Bluetooth* Smart connectivity IC and the Cortex M0 MCU. This design combines Nordic's connectivity simplicity with the industry's leading ultra-low power microcontroller core the ARM Cortex-MO MCU.

Features

- Complete reference design for a *Bluetooth* Smart wireless desktop solution
- Includes keyboard and mouse
- Based on popular ARM Cortex-M0 architecture for best performance and portability options
- Includes full source code and hardware design files

Content

- Keyboard
- Mouse
- Getting Started guide
- Programming tool
