

DV Dualband radio shield for Arduino

SKU 109990287

Description

DV Dual band radio shield for Arduino is a radio module that works with Arduino. This module has a 10mW UHF and VHF transceiver on board. In combination with an Arduino you make your own stand-alone dual band hotspot. This module, together with the AMBE3000 forms the basis for a self-assembly D-Star kit transceiver.

Features

- Fits on Arduino UNO and MEGA 1280/2560
- Dual band VHF/UHF radio
- 10 mW output power
- SMA antenna connector
- Complete assembled
- D-Star and DMR

Technical Details

Dimensions	129mm x 84mm x 46mm
Weight	G.W 45g
Battery	Exclude

Part List

DV Dualband radio shield for Arduino	1
